

www.ti.com SLOS647-AUGUST 2009

LOW-POWER SINGLE OPERATIONAL AMPLIFIER

FEATURES

- Qualified for Automotive Applications
- Wide Power-Supply Range
 - Single Supply: 3 V to 30 V
 - Dual Supply: ±1.5 V to ±15 V
- Large Output Voltage Swing:
 0 V to 3.5 V (Min) (V_{CC} = 5 V)
- Low Supply Current: 500 μA (Typ)
 Low Input Bias Current: 20 nA (Typ)
- Stable With High Capacitive Loads

OUT 1 5 V_{cc-} 2 IN+3 IN-

DESCRIPTION/ORDERING INFORMATION

The TS321 is a bipolar operational amplifier for cost-sensitive applications in which space savings are important.

ORDERING INFORMATION(1)

| T _A | PACK | AGE ⁽²⁾ | ORDERABLE PART NUMBER | TOP-SIDE MARKING | |
|----------------|----------------|--------------------|-----------------------|------------------|--|
| -40°C to 125°C | SOT-23-5 - DBV | Reel of 3000 | TS321QDBVRQ1 | 9CNS | |

⁽¹⁾ For the most current package and ordering information, see the Package Option Addendum at the end of this document, or see the TI web site at www.ti.com.

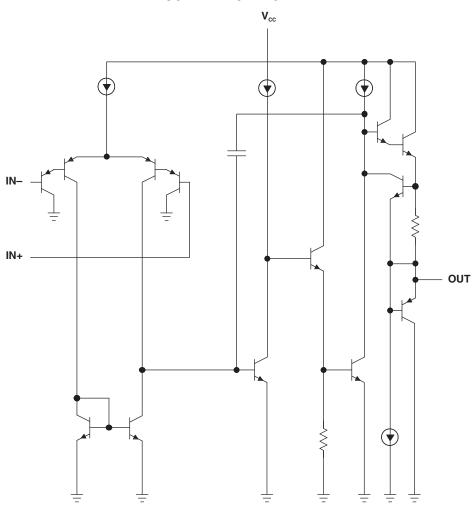

(2) Package drawings, thermal data, and symbolization are available at www.ti.com/packaging.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

SCHEMATIC DIAGRAM

www.ti.com SLOS647-AUGUST 2009

ABSOLUTE MAXIMUM RATINGS(1)

over operating free-air temperature range (unless otherwise noted)

| | | | MIN | MAX | UNIT | |
|--------------------|---|-------------|-----|-----------|------|--|
| ., | Supply voltage ⁽²⁾ | Single | | 32 | V | |
| V _{CC} | Supply voltage (| Dual | | ±16 | V | |
| V_{ID} | Differential input voltage (3) | | 32 | V | | |
| VI | Input voltage range (2)(4) | -0.3 | 32 | V | | |
| I | Input current ⁽⁴⁾ | | 50 | mA | | |
| t _{short} | Duration of output short circuit to ground | | U | Inlimited | | |
| θ_{JA} | Package thermal impedance, junction to free air ⁽⁵⁾⁽⁶⁾ | DBV package | | 206 | °C/W | |
| TJ | Operating virtual junction temperature | | | 150 | °C | |
| T _{stg} | Storage temperature range | | -65 | 150 | °C | |

⁽¹⁾ Stresses beyond those listed under Absolute Maximum Ratings may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under Recommended Operating Conditions is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

- These voltage values are with respect to the midpoint between V_{CC+} and V_{CC-}.
- Differential voltages are at IN+ with respect to IN-.
- (4)
- Neither input must ever be more positive than V_{CC+} or more negative than V_{CC-} . Maximum power dissipation is a function of $T_J(max)$, θ_{JA} , and T_A . The maximum allowable power dissipation at any allowable ambient temperature is $P_D = (T_J(max) - T_A)/\theta_{JA}$. Selecting the maximum of 150°C can affect reliability.
- The package thermal impedance is calculated in accordance with JESD 51-7.

RECOMMENDED OPERATING CONDITIONS

| | | | MIN | MAX | UNIT |
|-----------------|--------------------------------|---------------|------|-----|------|
| V _{CC} | Cumply voltage | Single supply | 3 | 30 | \/ |
| | Supply voltage | Dual supply | ±1.5 | ±15 | V |
| T _A | Operating free-air temperature | | -40 | 125 | °C |

| | Total supply current | No load | $V_{CC} = 30 \text{ V}$ | 25 C | | 600 | 900 | μΑ | |
| I _{CC} | Total supply current | $V_{CC} = 5 \text{ V}$ | | Full range | | 600 | 900 | μΛ | |
| | | V _{CC} = 30 V | | i un range | | | 1000 | | |
| THD | Total harmonic distortion | $V_{CC} = 30 \text{ V}, V_{O} = 2 \text{ V}_{pp}$ $R_{L} = 2 \text{ k}\Omega, f = 1 \text{ kHz}, C$ | $A_{V} = 20 \text{ dB},$ $A_{L} = 100 \text{ pF}$ | 25°C | | 0.015 | | % | |
| e _N | Equivalent input noise voltage | $V_{CC} = 30 \text{ V, f} = 1 \text{ kHz,}$ | $R_S = 100 \Omega$ | 25°C | | 50 | | nV/√ Hz | |

⁽¹⁾ The direction of the input current is out of the device. This current essentially is constant, independent of the state of the output, so no loading change exists on the input lines.

⁽²⁾ The input common-mode voltage of either input signal should not be allowed to go negative by more than 0.3 V. The upper end of the common-mode voltage range is V_{CC+} – 1.5 V, but either or both inputs can go to 32 V without damage.

PACKAGING INFORMATION

| Orderable Device | Status | Package Type | Package Drawing | Pins | Package Qty | Eco Plan | Lead finish/ Ball material | MSL Peak Temp | Op Temp (°C) | Device Marking (4/5) | Samples |
|------------------|--------|--------------|--------------------|------|----------------|--------------|-------------------------------|--------------------|--------------|-------------------------|---------|
| | | | | | | | (6) | | | | |
| TS321QDBVRQ1 | ACTIVE | SOT-23 | DBV | 5 | 3000 | RoHS & Green | NIPDAU | Level-1-260C-UNLIM | -40 to 125 | 9CNS | Samples |

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) RoHS: TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

RoHS Exempt: TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

Green: TI defines "Green" to mean the content of Chlorine (CI) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

- (3) MSL, Peak Temp. The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.
- (4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.
- (5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.
- (6) Lead finish/Ball material Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

SMALL OUTLINE TRANSISTOR

NOTES:

- 1. All linear dimensions are in millimeters. Any dimensions in parenthesis are for reference only. Dimensioning and tolerancing per ASME Y14.5M.
 2. This drawing is subject to change without notice.
 3. Reference JEDEC MO-178.

- 4. Body dimensions do not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0.25 mm per side.
- 5. Support pin may differ or may not be present.

SMALL OUTLINE TRANSISTOR

NOTES: (continued)

6. Publication IPC-7351 may have alternate designs.

7. Solder mask tolerances between and around signal pads can vary based on board fabrication site.

SMALL OUTLINE TRANSISTOR

NOTES: (continued)

- 8. Laser cutting apertures with trapezoidal walls and rounded corners may offer better paste release. IPC-7525 may have alternate design recommendations.
- 9. Board assembly site may have different recommendations for stencil design.
